IMPORTANT SAFETY WARNINGS AND INSTRUCTIONS READ PRIOR TO USING GALCO PRODUCTS

DANGER

When drawing a firearm from the holster, DO NOT place your finger on the trigger, in the trigger guard, or near the trigger. Position your finger along the frame of the firearm, above the trigger guard. Keep your finger off the trigger until your sights are on target.

WARNING

A significant number of negligent discharges - some resulting in injury or death - occur while holstering a firearm. Most are caused by the user’s index finger pressing the trigger. Some are caused because a foreign object becomes entangled or trapped in the trigger guard/holster and presses the trigger. The safest practice is to “look the firearm into the holster.” This should be done methodically and without rushing. While holstering, be fully cognizant that:

1. All safeties are engaged.
2. Your index finger is straight along the firearm’s frame. DO NOT place your finger on the trigger, in the trigger guard, or near the trigger. Keep your finger off the trigger until your sights are on target.
3. No articles of clothing (shirt tails, jacket drawstrings, etc.) become trapped in the trigger guard, holster, or between the firearm and holster.
4. Your shooting/hand thumb is placed over the hammer or the rear of the slide. This will enable you to feel if the hammer starts to move rearward or the slide begins to come out of battery.
5. You strictly observe Rule of Firearms Safety #2: never let the muzzle cover anything you’re not willing to destroy. If you do not know how to holsters your firearm without breaking this rule, you should seek training before holsters your firearm while the holster is worn.

WARNING

If for any reason you are unable to “look the firearm into the holster” and not muzzle yourself or others, you should remove the holster from your body, then “look the firearm into the holster” (without breaking Rule #2). After the firearm is securely seated in the holster, attach the holster to your body/clothing in the manner in which it was designed.

FAQ

1. Why do you need to know what a “shop by gun” feature is?
   - “Shop by Gun” is a feature that allows you to select a firearm and then choose a holster that is designed to fit that specific firearm. It is important to understand that all products, including firearms and holsters, may eventually “wear out” or become unsuitable for the function for which they were designed. Stress and strain placed on a product will vary according to frequency and conditions of use, and therefore it is difficult to indicate a recommended replacement date for this product.

INSPECTIONS / MAINTENANCE, ADDITIONAL USER RESPONSIBILITIES

NOTICE

It is the user's responsibility to inspect the holster before and after each use for signs of excessive wear or loss of retention capability, and appropriate tightness of all hardware.

PRODUCT IDENTIFICATION

Galco products are generally identified with a two-part code stamped into the holster body or label affixed to the item. An alphabetical or alphanumeric prefix identifies the holster model. For example, the FLETCH model’s prefix is FL while the Royal Guard’s prefix is RG.

The numerical suffix identifies the particular firearm the holster is intended to fit. For example, the 212 suffix indicates a 5” 1911 while the 224 suffix indicates a Glock 17. The letter “B” or “H” at the end of the code indicates color. B is for black, H for Havana brown, while no letter generally indicates tan.

Thus, an FL212 (FL + 212 + no letter) will be a tan FLETCH to fit a 5” 1911, while an RG224B (RG + 224 + B) will be a black Royal Guard for a Glock 17.

Holsters intended for Galco’s modular holds systems display letters and numbers that correspond to guars. A Miami Classic holster intended for a SIG P250, for example, will simply read 820. A VHS 3.0 holster intended for a Beretta 92FS will read V3-202.

The numerical suffix of holsters intended for right-hand or ambidextrous use will end in an even number. The suffix of holsters intended for left-hand use will end in an odd number.

You may use the “shop by gun” feature found at our website, GalcoUSA.com, to locate a holster fit. Simply enter the model number on the item (FL224B, for example) in the field. Should you have questions regarding the identification of the firearm intended for your Galco product, you may also contact Galco's customer service department at 800-874-2526 (during business hours) or by email at customerservice@galcogunleather.com.

Some Galco holsters are approved for use with multiple firearms. Care must always be taken to ensure your holster is an appropriate and approved fit for your firearm. Never carry a firearm in any holster not specifically recommended by Galco for that firearm.
Our saddle leather products are made from natural full grain steerhide that are range bred and grown. Therefore, there may be natural range markings in the grain of the saddle leather. This is normal for full grain steerhide and adds to the beauty and character of your Galco leather product. These same natural range markings may also appear in our genuine horsehide. Premium Center Cut Steerhide™ is steerhide with the outer and inner layer removed. It has been treated at the tannery in such a way as to retain its natural lateral strength and, at the same time, provide a soft inner layer to protect the firearm’s finish. It also has an outer layer finish that is ideal for inside the waistband and pocket holsters due to its natural “grabbing” ability. Center Cut Steerhide works equally well for general holster designs because its exterior does not show scuffing or scratches.

Galco holsters, belts and accessories require minimal care and maintenance. However, following the instructions below will add to the service life of your Galco product.

### SAFETY SYMBOL DEFINITIONS

**DANGER**
Indicates a hazardous situation which, if not avoided, will result in death or serious injury.

**WARNING**
Indicates a hazardous situation which, if not avoided, could result in death or serious injury.

**CAUTION**
Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

**NOTICE**
Used to address practices unrelated to potential personal injury.

Visit GalcoUSA.com/videos to view related safety and product use videos.

### CARE, MAINTENANCE AND STORAGE DO

**NOTICE**
Full grain leather holsters that come in contact with bodily perspiration, the elements, or become soaked on a regular basis may need to be treated periodically to slow the natural breakdown of the leather fibers. Dry the leather naturally, without any type of artificial heat.
Clean synthetic material as needed by hand using a soft bristle brush. If additional cleaning is needed, wash by hand with a mild soap and water. Allow to air dry naturally.

**NOTICE**
Dirt and grit trapped in your holster may harm your firearm’s finish. To clean your holster, especially after use in dusty conditions, simply wipe out the interior of the holster using a clean, damp cloth.

### DON’T

**NOTICE**
Do not store your firearm in a holster if the holster is damp from perspiration or in otherwise moist condition.
Do not use Loctite® or threadlock. Out-gassing from those adhesive compounds will adversely affect plastic, nylon and rubber holster parts.
Do not put Galco synthetic material products in the washing machine.
Do not submerge or saturate your leather product in water or any other liquid or dry your leather product with heat from a dryer, oven, radiator, direct sunlight, etc.
Do not use products such as Neats Foot or Mink oil. They will damage the leather. Additionally, do not use Galco Leather Lotion or other leather conditioners on Premium Center Cut Steerhide or synthetic materials.
Do not leave your Galco product on the dashboard of your car in summer, or leave it otherwise exposed to the elements.

**NOTICE**
The above care and maintenance instructions cannot substitute for your good common sense. Following our recommended care and maintenance tips, along with common sense, will allow you to get the maximum service life from your Galco products.

### HOLSTER FIT / BREAK-IN

**NOTICE**
If the holster has tension screws: Tension units are not pre-set at the factory. You may need to adjust them in order to holster your handgun the first time. We recommend that you check your tension screw adjustments before each use. There is no reason to completely remove tension units. Do not use Loctite® on tension units. However, a single drop of clear nail polish applied to your tension screw threads may reduce its unwanted loosening.
If the fit is too tight when holsterng your firearm the first time don’t force it. If you do force the firearm into the holster, it may be very difficult to remove. Instead, follow these simple steps to break in your new holster using a process called blocking:

1. Place the unloaded firearm in a plastic freezer bag, or cover it in 2-3 layers of plastic kitchen wrap. Do not cover the grip.
2. Insert the bagged/wrapped firearm slowly into the holster, gently twisting it side-to-side to minimize tearing of the bag/ wrap.
3. Once the firearm is completely seated in the holster, twist it approximately 1/16” in both directions 6-12 times.
4. Allow the bagged/wrapped firearm to sit in the holster for approximately 15 minutes.
5. Remove the firearm from the holster and remove the bag/wrap from the firearm.
6. Insert the unloaded firearm into the holster, which should now be snug but not loose. If it is still too tight, repeat the above steps until the holster is broken in to your satisfaction.
7. If necessary, repeat steps 1-6 with an additional plastic freezer bag or an additional 2-3 layers of plastic freezer wrap.

**NOTICE**
If your holster has a retention strap:
You may need to stretch the retention strap using your fingers only (no tools, no water, no chemicals etc.), before you get it to snap.

1. Place the unloaded firearm in the holster.
2. Hold the firearm grip in your strong hand and the retention strap in your support hand.
3. Prepare the strap for stretching by grasping the snap and pulling the strap taut (remove the slack).
4. Twist the strap 90 degrees back and forth in clockwise and counterclockwise rotation 10-12 times while keeping it taut.
5. Firmly push the firearm away from you while pulling on the strap and continue rotating the strap.
6. Release the tension for a moment and repeat two or three times.
7. Pull the strap over the back of the firearm without releasing tension.
8. While maintaining the strong tension, attempt to snap the retention strap closed.
9. Repeat step 5 as needed.

Following and repeating the above instructions is the only way to an ideal break-in and long service life with proper fit that will last many years.

It is common for the inside of a leather holster to scratch from a single holstering (called etching). A smooth leather lined holster will be even more subject to this normal occurrence. After this initial etching, the holster will custom fit your firearm.

Some modern pistols have very sharp edges, particularly surrounding the ejection port. This may cause an initial feeling of “dragging” on the draw, but will normally resolve quickly with just a few draw-and-holster repetitions.

### REPAIRS

Great care was taken to select the finest materials available to craft your Galco product. It was designed in accordance with the highest engineering standards and hand made using traditional leather craft practices that have become Galco hallmarks over five decades. In the unlikely event a repair is necessary to an unaltered Galco product, simply contact our Customer Service department at 800-874-2526 or customerservice@galcogunleather.com. We will issue you a Return Authorization (RA) number to print on the outside of your shipping container and provide you with detailed shipping instructions.

### TERMS OF SALE

Because we have no control over the use of our products, all Galco products are sold as is and “with all faults”. The entire risk as to the quality and performance of the product is with the buyer. Should the product prove defective following its purchase, the buyer and not the manufacturer, distributor, or retailer assumes the entire risk of all the necessary servicing or repairs. Under no circumstances shall Galco be liable for incidental or consequential damages, such as loss of use of property, commercial loss and loss of earnings or profits. The implied warranties of merchantability and fitness for a particular purpose and all other warranties, expressed or implied, are excluded from this transaction and shall not apply to the product sold. The determination of the fitness or the suitability of any product for a specific use is the responsibility of the buyer. The illustrations shown herein are typical as to the finish and application. Due to uncontrollable variances in color saturation, the actual product may differ slightly from that shown on our web site. Galco reserves the right to make changes in product built and/or sold by them at any time without incurring any obligation to make same or similar changes on products previously manufactured and/or sold by them. All Galco products are made in the U.S.A. and produced according to rigid specifications. Prices and models are subject to change without notice. Some states do not allow the exclusion or limitation of implied warranties or liability for incidental or consequential damages, so the above limitations and exclusions may not apply to you. Galco designs, features, and model names are the exclusive property of Galco International. Any and all persons including, but not limited to, individuals, firms and/or corporations are forbidden from imitating, copying or reproducing them in any way.

Galco’s Holster Care Kit includes everything needed to clean and maintain full grain leather holsters and accessories. Includes Galco Leather Lotion, Draw-EZ, plus applicators and cleaning pads. Leather Lotion and Draw-EZ may be purchased separately.

Order online at GalcoUSA.com by calling 800-874-2526, or at your local Galco stocking dealer.
